Achieving good clinical outcomes with implanted biomaterials depends upon achieving optimal function, both mechanical and biological, which in turn depends upon integrating advances realized in biological science, material science, and tissue engineering. As these advances push back the frontiers of biomaterial medicine, the control and patterning of bio-implant interface reactions will have a tremendous impact on future design and prospects of implant treatments.

The pursuit of new and better designs for improved biocompatibility and patient response to implants continues to challenge clinicians and scientists alike. This book offers a unique opportunity to bring yourself up to date on recent advances in the field and on new strategies for controlling the bio-implant interface.

Where biomaterials meet living tissue—what happens, why it happens, and how to use that information

Bio-Implant Interface: Improving Biomaterials and Tissue Reactions brings together a remarkable panel of scientists to present the state of the art in our understanding of interactions at the interface between biomaterials and living tissue. Much of the focus is on the importance of the implant surface’s topography and chemistry to its interaction with the biological environment. Biomineralization along with the biological content of the interface and its role in directing cellular response along desired pathways also receive particular attention.

FEATURES

- Describes the state of the art in our understanding of the interface between implants and tissue
- Presents chapters contributed by a stellar panel of scientists from leading academic and research institutions around the world
- Provides a unique and important focus on the biological information in the interface that directs cells along advantageous pathways
- Includes a section that explores the potential of advances on the horizons of current research
- Incorporates more than 175 illustrations—some in full color

Catalog no. 1474, April 2003
464 pp., ISBN: 0-8493-1474-7, $179.95 / £120.00

See reverse side for contents
**Bio-Implant Interface: Improving Biomaterials and Tissue Reactions - CONTENTS**

**SUCCESS AND FAILURE FOR BONE-IMPLANT ATTACHMENTS: AN EVIDENCE-BASED APPROACH**
The Role of Implant Surface Properties on the Clinical Outcome of Osseointegrated Oral Implant Therapy, M. Espinosa, H.V. Worthington, P. Coulthard, A. Wennnerberg, P. Thomsen

**CAN THE IMPLANT MACRO DESIGN AND MICRO TEXTURING IMPROVE BONE RESPONSE?**
Toward an Optimized Dental Implant Design, S. Hansson

**CELL AND TISSUE REACTIONS TO BIOMATERIALS**

Osteoblast Response to Pure Titanium and Titanium Nitride, M. Patte, J.C. Wong

Cellular Interactions at Commercially Pure Titanium Implants, L.F. Cooper

A Selection of Oral Implant Materials Based on Experimental Studies, P. Thomsen, C.B. Johannson

Possibilities to Improving Implants and Regenerating Dental Pulp Tissues by Tissue Engineering Using Stem Cells and Growth Factors, I. Thesleff, M. Taunum

Critical Issues in Endosseous Peri-Implant Wound Healing, I.E. Davies, J.Y. Park

**THE EXTRACELLULAR MATRIX BIOLOGY AND BIOMINERALIZATION IN BONE FORMATION AND IMPLANT INTEGRATION**

Use of a Matrix Scaffold for Tissue Engineering and Bone Regeneration, M. Bartold, Y. Xiao

Inducing Bone Growth Using Extracellular Matrix Proteins, S.P. Lystgaardads, J.E. Ellingren, A. Sjahr, I. Sjahr

**SURFACE CHEMISTRY, BIOCHEMISTRY, AND MOLECULES: HOW DO THEY INTERACT WITH BIOLOGICAL ENVIRONMENT?**
How Surfaces Interact with the Biological Environment, P. Tengvall

Osteocapacities of Calcium Phosphate Ceramics, J. Jansen, P.J. Rutge, E. van der Wal, A.M. Vredenberg, J.G.C. Welke

Increasing Biocompatibility by Chemical Modification of Titanium Surfaces, J.E. Ellingren, S.P. Lystgaardads

**DEVELOPMENT AND APPLICATION OF SCIENTIFIC DATA: REGULATORY AND COMMERCIAL ASPECTS**
Development and Application of Scientific Data: Do Industry and Academia Have Different Scientific Perspectives? B. Delin

Medical Devices—Regulatory Perspectives and Aspects of Regulatory Risk Management, S. Gasterlius, A. Hensten-Pettersen

**INVENTIVE FORWARD LOOKS—WHERE DO WE GO FROM HERE?**
Self-Assembling and Bimimetic Biomaterials, S. Stopp, E. Berluish, J.D. Hartgerink, E.D. Sone

The Inert-Bioactivity Conundrum, D.F. Williams

Enhancing the Process of Discovery and Innovation for Optimal Host Response at the Implant Surfaces, M.L. Snead

**Please use this ORDER FORM, CALL or ORDER ONLINE at www.crcpress.com**

**Ordering Information:** Orders must be prepaid or accompanied by a purchase order. Checks should be made payable to CRC Press. Please add the appropriate shipping and handling charge for each book ordered. All prices are subject to change without notice. U.S./Canada: All orders must be paid in U.S. dollars. Tax: As required by law, please add applicable state and local taxes on all merchandise delivered to CA, FL, GA, IL, MA, NJ, NY, and Washington, DC. For Canadian orders, please add GST. We will add tax on all credit card orders. European Orders: All orders must be paid in U.K. £. VAT will be added at the rate applicable. Textbooks: Special prices for course adopted textbooks may be available for certain titles. To review a textbook, please go to www.crcpress.com/eval.htm

**Satisfaction Guaranteed:** If the book supplied does not meet your expectations, it may be returned to us in a saleable condition within 30 days of receipt for a full refund.
